

**In the Specification:**

Please amend the paragraph starting on page 7, line 8, as follows:

In translating software program 13, the translation system 18 interprets individual instructions within software program 13 and determines an equivalent set of instructions that are compatible with operating system 17. The translation system 18 then transmits the equivalent set of instructions to operating system 17 which executes the equivalent set of instructions. An example of such a translation system 18 is disclosed in co-pending U.S. patent application, ~~Express-Mail number EH076678088US~~, Patent No. 6,062,530, filed on February 25, 1998, ~~(attorney docket number 10070822)~~, by Buzbee *et al.* and entitled "Dynamic Translation System and Method for Optimally Translating Computer Code," which is incorporated herein by reference as if set out in full hereinbelow.
